

# Mines and Mining Stocks

## DALY-JUDGE'S BIG DIVIDEND

Second Quarterly Distribution of \$112,500 Ordered Paid April Twelfth.

UTAH MINE IS IN LINE, ALSO THREE CENTS A SHARE TO BE PAID NEXT WEEK.

The Daly-Judge Mining company yesterday posted its regular quarterly dividend of \$112,500, or 37 1/2¢ per share. It will be checked out on April 12, and transfer books will close on the 31st to reopen on April 13. The company's initial dividend was paid in January, and the management states that this quarter's dividend has been earned, while a goodly sum has been added to the surplus.

All of the necessary data required by the officials of the Boston and New York exchanges, preliminary to the listing of this stock, has been forwarded, and the expectation is that trading in it will be shortly authorized. Miscellaneous roads are just now interfering a little with the shipment of ore and concentrates, but the usual output is being maintained and the product stored in the great bins. The mine is reported to be looking better than ever, while the opening of new territory is going vigorously on.

The regular monthly dividend of the Utah Mine company was declared yesterday afternoon. It is for \$3,000, or 3¢ a share, and payment is to be made on the 21st, with transfer books to close tomorrow evening. Usually the company pays within a day or two after closing the books, but this month a little more time is taken because of the absence of the secretary at the mine. An extra heavy carload of ore has just been shipped from the railroad loading station at Oasis, and the management is counting upon its bringing in the neighborhood of \$10,000. The new hoist and other machinery for the property is now being hauled to the mine from Oasis and, as a great deal of lumber and other material had previously gone in it will not be long till the company's new works are completed and in commission.

## TEN THOUSAND DOLLAR ORE IN THE GIBRALTAR

Rhyolite, Nev., March 13.—The mystery that has been shrouding the operations at the Gibraltar mine on Bonanza mountain during the past three weeks, when visitors were barred from the workings, was cleared up this week with the arrival on the ground of J. R. Wier of New York.

Mr. Wier, who is one of the principal owners of the property, and a member of the firm of Wier Brothers of New York, paid a visit to the mine the morning after his arrival in southern Nevada and after his return from the property was closeted with John A. Largent, who represents the Ray interests of Nevada and the Governor Wier interests of Philadelphia in Rhyolite.

After the conference it developed that Wier had come west in response to a telegram from the mine superintendent reporting the opening of a vein of \$10,000 rock in the Gibraltar workings.

As soon as Largent and Wier held their conversation, both men began to purchase of Gibraltar stock from local holders, and within a few hours large blocks of the stock were bought in. Even before the discovery of the Gibraltar was one of the best properties in the Bullfrog district, as the railroad is within 200 yards of the dump, where hundreds of tons of ore are stacked awaiting shipment to the Salt Lake smelters.

## ANOTHER BIG COMPANY FOR BINGHAM CAMP

The Bingham-Butte Copper Mining company, with 1,000,000 shares, has been organized under the laws of South Dakota to operate in the camp of Bingham. The company has been formed to take over the Copper Hill and Midland companies' possessions, embracing about 240 acres of fine mineral-bearing ground on which considerable work has already been done, and in which some good ore has been found.

Behind this proposition is a strong combination of Butte and eastern talent which is represented by John F. Cowan, who is named as president and general manager. Preparations are being made for a vigorous campaign of development in both groups of claims during the present year and work, which is now being done entirely by hand, will be hastened by the installation of compressor plants and power drills. Manager Cowan has had a great deal of experience in the copper camp of Butte, and he is enthusiastic over the prospects which the new company's holdings present. He will solve the enterprise his personal attention from this time until he has made a big producer of the properties.

## A Bird Cage Shipment

We are now in a position to fill your bird cage orders. A shipment of Hendryx Parrot and Canary Cages, painted and brass, now opened.

King Hardware & Stove Co.  
168 Main Street

## MINING STOCK EXCHANGE.

Eastern Panicky Conditions Are Reflected in Local Trading.

Eastern market conditions were reflected in the trend of the local market yesterday to an appreciable extent. With the exception of a few supported specialties, everything sold off. Many local traders patronize the eastern markets and, while most of this class of trading is done by conservative and strong operators who had previously discounted the terrific slump that is now going on, some have been caught, and sales of local stocks have been imperative in order that outside holdings might be protected. Strongest stocks have had to go and buyers have taken advantage of the necessities of sellers. With the eastern flurry over, however, every one of the weak ones will recover, for the intrinsic worth is borne them.

During the two regular and open board calls a total of 44,300 shares of stock, with a selling value of \$48,063.50, changed hands, the list of final quotations and record of sales made being as follows:

## OSCEOLA STOCKHOLDERS FIGHT TRANSFER OF MINE

Boston, March 14.—The Osceola Mining company's annual meeting was today adjourned to April 1, after a brief session, on account of pending litigation, intended to prevent control of the Osceola passing to the Calumet & Hecla Mining company.

Behind this proposition is a strong combination of Butte and eastern talent which is represented by John F. Cowan, who is named as president and general manager. Preparations are being made for a vigorous campaign of development in both groups of claims during the present year and work, which is now being done entirely by hand, will be hastened by the installation of compressor plants and power drills. Manager Cowan has had a great deal of experience in the copper camp of Butte, and he is enthusiastic over the prospects which the new company's holdings present. He will solve the enterprise his personal attention from this time until he has made a big producer of the properties.

## LEAD KING PROPERTY AT DUCK CREEK, NEV.

Provo, March 14.—J. F. Brim, the veteran Ely and Duck Creek mining man and principal owner in the Lead King and the Lead Bullion Mining companies, in addition to which he has other large interests in White Pine county, is in on one of his periodical trips. He brings most encouraging reports of Ely and Duck Creek and of the Lead King mine, from which are running from 75 to 100 per cent lead being taken out, and which has hundreds of tons of this class of ore in sight in the Morning Star drift.

The Gray Eagle incline on a different vein from that of the Morning Star is in sixty feet and the same kind of ore has been encountered in large quantities. The two veins dip toward one another and it is fully expected they will join in a large body of ore.

The ore is being sacked ready for shipment as soon as shipping facilities can be obtained, and the 15 to 20 per cent lead ore is being piled on the dump till the big Steptoe valley smelter, now in course of erection, is ready to handle it. The company has fifteen claims and have the oldest and best developed claims in the district, from which ore was shipped years ago.
